

National Center for Rehabilitative Auditory Research Summer Research Traineeships for Au.D. Students

- Participate in an intensive 3-month research experience at the National Center for Rehabilitative Auditory Research
- Work alongside scientists on a variety of studies of hearing disorders in adults
- Learn about the process of clinical research in audiology
- Attend seminars and lectures by outstanding auditory scientists
- Be an active participant in ongoing discussions of current and future auditory research at the NCRAR
- Share your research experience with other Au.D. students from around the country
- Present your research experience at the 2010 AAS meeting in Arizona

**Spend the Summer in
Beautiful Portland!**

A limited number of students will be selected following an application process and recommendations from your Au.D. program faculty. See [application form](#) and [instructions](#) and the [letter sent to your Au.D. program chair](#). Funding will be provided to defray costs of travel and living expenses in Portland. For additional information about the NCRAR and descriptions of ongoing research see www.ncrar.research.va.gov.

For further information, please contact either:

Dr. Gaby Saunders, (503)220-8262 ext 56210, Gabrielle.Saunders@va.gov

Dr. Marjorie Leek, (503)220-8262 ext 54692, Marjorie.Leek@va.gov

The National Center for Rehabilitative Auditory Research (NCRAR) is a VA Rehabilitation Research and Development Center of Excellence, dedicated to the discovery of cutting-edge solutions to auditory dysfunction, and the translation of research findings into the clinical practice of audiology.

The NCRAR is located at the Portland (Oregon) VA Medical Center. Portland has been proclaimed as North America's "Best Big City," according to *Money* magazine. It is a city of unmatched natural beauty, and boasts a bustling local scene, interesting museums and gardens, and sumptuous dining-- all effortlessly accessed thanks to its justly-famous public transportation system.
