

# Do you have Constant Tinnitus?

(Ringing or Buzzing in the Ear)

Title of Study: Establishing Normative Standards for Measures of Tinnitus Perception Study ID #3118

The National Center for Rehabilitative Auditory Research (NCRAR) at the VA Portland Health Care System is seeking individuals with **constant tinnitus** (ringing, humming, buzzing noise in the ears or head) for a research study to measure tinnitus using a computerized testing system.

Dr. James Henry is the Principal Investigator of this research.

## You may qualify for the study if:

- (1) You have had **constant tinnitus** (ringing, humming, buzzing or other sounds in the ears or head) **for at least 6 months**.
- (2) You may be a Veteran or a non-Veteran to participate.

**This is research and not treatment.** Study participation requires four appointments over a span of about 6 months. The appointments may last up to 3 hours each. You will be paid \$25.00 for each appointment, for a total of up to \$100.

You may benefit from the study by having your hearing tested, and/or by learning about your tinnitus.

For more information, please call Candi:
