

Volunteers Needed for Research Study

The National Center for Rehabilitative Auditory Research (NCRAR) is looking for individuals to take part in hearing-related research.

We need volunteers between 50 and 75 years of age and with mild to moderate hearing difficulty to participate in a study to examine cognitive effects (such as working memory, speed of processing, and attention) on hearing aid benefits. This is not a treatment.

If you might be interested in taking part or want more information please call:

Keri at (503) 220 8262 ext. 56261

An appointment for a hearing test will be arranged to see whether you meet the study criteria.

You may benefit from receiving a clinical hearing test and consulting with an audiologist regarding the results.

The study usually requires three 2-3 hour visits. You will receive \$30 for each visit.

**The NCRAR is located at Portland VA Medical Center
3710 SW US Veterans Hospital Rd. Portland OR**

The NCRAR is a VA-funded Center of Excellence whose mission is to benefit veterans by alleviating the economic, social and communicative problems resulting from auditory system impairment.
