

**Do you have constant tinnitus?
(Ringing or buzzing in the ear)
Join a VA Portland research study!**

The National Center for Rehabilitative Auditory Research (NCRAR) is conducting a study to measure tinnitus using a computerized testing system.

Titled: Validation and Expansion of Established Norms for Measures of Tinnitus Perception Study ID #4188

DETAILS: Study participation requires up to four appointments over a span of about 6 months. Each appointment may last up to 3

hours and receive \$75 for each visit attended.

BENEFITS: Participants learn about their hearing and tinnitus.

ELIGIBILITY: Veterans and non-Veterans ages 18 – 50 with constant tinnitus (ringing, humming, buzzing or other sounds in the ears or head) for at least 6 months.

This is a research study, not treatment.

Dr. Robert Folmer, Principal Investigator; IRB #4188
